IDENTIFIERS *Arkansas

ABSTRACT

Fall 1984 on-campus enrollment data in Arkansas colleges and universities are presented, along with a narrative description of trends. Statistical tables provide trend data for the state as a whole as well as data for specific institutions on: fall on-campus headcount by student level and type of institution, 1974-1984; number and distribution of fall full- and part-time on-campus headcount students, 1980-1984; fall on-campus headcount of first-time enrollees; legal residence of students at state-supported and private institutions, and sex and median age of students. Trend analysis for 1984 included findings that: Arkansas colleges and universities experienced a mild enrollment decline of 0.8% in fall 1984; the number of full-time first-time freshmen declined by 3.1%; in total, unclassified prebaccalaureate enrollment rose by 2%, largely as a result of the increase in part-time students; graduate and first-professional enrollment increased by 9.6%; the number of women enrolled at Arkansas institutions increased by 5%; women now represent 54.4% of the total student body; the total number of out-of-state part-time students increased by 4.2%; and the average load for full-time students declined to 14.55 hours. Twenty-three supplementary data tables, as well as a glossary and a list of institutional names and abbreviations, are appended. (SW)

FOREWORD

This is the fifth in a series of annual reports on fall on-campus enrollment in the State of Arkansas. The information in this report is based upon data collected by the Arkansas Department of Higher Education (ADHE) through the Arkansas Higher Education Information System (AHEIS), a network of public and independent colleges and universities that share data in order to improve both undergraduate and graduate education.

Through the diligence of the member institutions who regularly and promptly provide these data, ADHE can offer analyses and comparisons of higher education information for use in institutional planning and evaluation. These reports often provide a means of communicating important new or continuing trends that effect many aspects of Arkansas college and university operations. For example, sections on the increasing numbers of part-time students and the increase in the ratio of women to men at the institutions provides administrators with tools with which to deal with the decline of full-time first-time entering students.

This report was composed by Mark A. Byrd with editorial assistance from John Spraggins. The ADHE production division, supervised by Mary Griebel, provided assistance in typing various tables and running the final publication. The ADHE staff invites suggestions on how we might improve this report in future editions.

EXECUTIVE SUMMARY

Arkansas colleges and universities experienced a mild decline of 0.8% from last year's all-time high of 73,905. The largest decline came within the state-supported two-year category with a decline of 436 students. The independent two-year institutions appear to have the largest decline; nevertheless, this decline in headcount is a result of Southern Baptist College (SBC) moving from the independent two-year to the independent four-year category. The independent four-year institutions show the only increase; however, without data to account for the move by SBC into the independent four-year category, the independent four-year group would have shown a declined of 0.5%.

Although the college-going rate was up by 0.1 percentage point over last year, the number of full-time first-time-entering freshmen declined by 3.1% to a low of 12,670. This decline in full-time first-time-entering students is expected to continue as the number of high school graduates continues to decline as well. The independents show the only increase in the number of full-time first-time enrollees.

Upper-division enrollment has decrease from last year's 19,768 by 0.5%. The decline was due to the downswing in full-time students at both the state-supported and independent institutions. In total, unclassified pre-baccalaureate enrollment rose by 2%. This increase is a result of the 7.4% increase in part-time students. Graduate and first-professional enrollment increased 9.6%, bringing the total to 6,796.

Part-time enrollment continued to increase to an all-time high of 20,624. Every institutional category reported percentage increases in part-time students with the greatest increases in percentage points occurring at the state two-year institutions -- 2.4. Although the number of part-time students has increased, the net result of the difference between the loss in full-time students to the increase in part-time is a decrease of 577 students.

The number of women enrolled at Arkansas institutions has increased by 5% over last year and now represents 54.4% of the total student body in Arkansas' colleges and universities. Regionally, women as a percent of total enrollment rose steadily from 1965 to 1975 by an average of 0.48 percentage points annually, while from 1975 to 1982 female enrollment rose 1.23 percentage points annually.

Median age of students has remained relatively stable over the past four years. This trend will more than likely change as successive pools of first-time-entering freshmen continue to decline as a percent of the total undergraduate enrollment. The median age for full-time and part-time first-professional students is down one year and two years, respectively. This might mean that students are deciding at an earlier age to pursue careers in medicine or law.

Total full-time out-of-state enrollment has declined to less than those figures reported in 1982. The state two-year colleges increased slightly over last year; however, the number of full-time out-of-state students is still under the 1981 figure. The number of part-time out-of-state students enrolled at the two-year institutions is also slightly up from last year. The total number of out-of-state part-time students has increased by 4.2%.

The average load for full-time students declined from last year's 15 hours to 14.55 hours in 1984. The average load for part-time students, however, has not varied and remains at 5 hours. The average load for full- and part-time graduate students was 11 and 4 hours respectively. The average load for medical students at the University of Arkansas for Medical Sciences was the heaviest within the first-professional category at 19 hours per student.

ON-CAMPUS ENROLLMENT IN ARKANSAS HIGHER EDUCATION INSTITUTIONS, FALL 1984

Data used in the fall 1984 on-campus enrollment report are based on the eleventh class day enrollment figures for Arkansas' 32 state and independent colleges and universities. This report not only includes discussions concerning trends by type of institution, student level, and attendance, but also examines some demographic characteristics such as age, sex, and current legal residence. Additional data regarding individual institution headcount, average load, current legal residence, and age are provided in Appendix A. Appendix B contains a glossary of terms commonly used in ADHE's annual reports. Finally, institutional names and corresponding abbreviations are provide as Appendix C.

ENROLLMENT TRENDS BY TYPE OF INSTITUTION

According to a recent survey sponsored by the Association Council for Policy Analysis and Research (ACPAR), published in the Chronicle of Higher Education,[1] college and university enrollments are holding steady for the fall 1984. This was true for Arkansas' colleges and universities, which showed a mild 0.8% decline from last year's all-time high of 73,905. Table 1 separates on-campus headcount by type of institution and with the exception of the independent four-year institutions every category of institution saw a decline over last year's headcount. The independent two-year institution category showed the largest decline because Southern Baptist College (SBC) was accredited in 1983 to award baccalaureate degrees. Because of the move by SBC into the independent four-year institutions category, the data for this group showed a 5.3% increase in on-campus headcount. Without the added headcount of SBC, the independents four-year category would have shown a 0.5% decrease.

TABLE 1. FALL ON-CAMPUS HEADCOUNT BY TYPE OF INSTITUTIONS, 1974 THROUGH 1984

Fall	State-Supported Two-Year Institutions	State-Supported Four-Year Institutions	Independent Two-Year Institutions	Independent Four-Year Institutions	Total
1974	5,891	39,599	601	7,862	53,953
1975	9,869	44,519	621	8,158	63,167
1976	10,284	46,956	627	8,561	66,428

State Two-Year

The national unemployment rate has declined since 1982 by 2.4 percentage points; similarly Arkansas' unemployment has declined, but to a lesser extent, by 0.9 percentage points to a rate of 8.3.[2] Many researchers feel that the economic cycle and college attendance patterns are correlated, and, now that the economy is ameliorating, experts are predicting that the community colleges will be the institutions most adversely affected because of nontraditional students returning to work. While this report does not feature statistical tests allowing formal inference regarding causality, a casual look at the data reveals that the state-supported two-year institutions are experiencing enrollment loses in line with these predictions. Table 2 provides figures and the corresponding percent change from fall 1983 to fall 1984. The state-supported two-year institutions declined 3.4% from last year's all time high of 12,767. Four of the two-year institutions experienced an increase in fall on-campus headcount. North Arkansas Community College (NACC) was up 8.2%, Rich Mountian

Source: ADHE 02 Series and 15 Series

* Southern Baptist College was accredited in 1983 to award baccalaureate degrees.

** Includes SBC figures in neither 1983 nor 1984.

*** Includes SBC figures for 1983 and 1984.

Community College (RMCC) was up 14.4%, and Southern Arkansas University - El Dorado Branch (SAUE) was up 11.7%. Additionally, Table 2 shows, of those institutions that have shown an increase in headcount, that only SAUE had an increase in full-time-equivalent (FTE) above the percentage increase in headcount. The increase in SAUE's FTE indicates a rise in the number of full-time students while the other colleges -- NACC, RMCC -- had a larger increase in part-time students. The largest decline in both FTE and headcount came at Arkansas State University - Beebe, with 25.4% and a 24.1% decline respectively.

State Four-Year

Declining by only 0.2%, the state four-year institutions fared somewhat better than did the two-year colleges. In contrast to the findings of the ACPAR survey, enrollments for the universities that grant doctoral degrees are anticipated to rise slightly when the final figures are in; however, the University of Arkansas at Fayetteville and the University of Arkansas for Medical Sciences experienced declines of 3.8% and 3.9% respectively. ACPAR also predicted that comprehensive universities would decline in academic year 1984-85. Contrary to these predictions, the University of Arkansas at Pine Bluff (UAPB) showed the largest percentage increase in headcount with 7.6%, followed by the University of Central Arkansas (UCA) and Arkansas Tech University (ATU), 4.2% and 2.4% respectively. ATU remained unchanged in FTE while UCA increased by 2% and UAPB increased by 3.6% bringing the total FTE for the state four-year institutions to 43,785, a 3% decline from the previous year (see Table 2).

Many states are implementing policies affecting growth in enrollment. The realization of increased enrollments of older and part-time students have compensated somewhat for the shrinking of the traditional college population. This increase in part-time students can be seen in Table 4. The section on part-time enrollment will feature further discussion of nontraditional students.

Although total enrollment was down, the state and independent four-year institutions received a greater proportion of the total enrollment than in the previous year. Last year, the state four-year institutions received 70.7% of the total enrollment, whereas in 1984 they received 72.7% of the total.

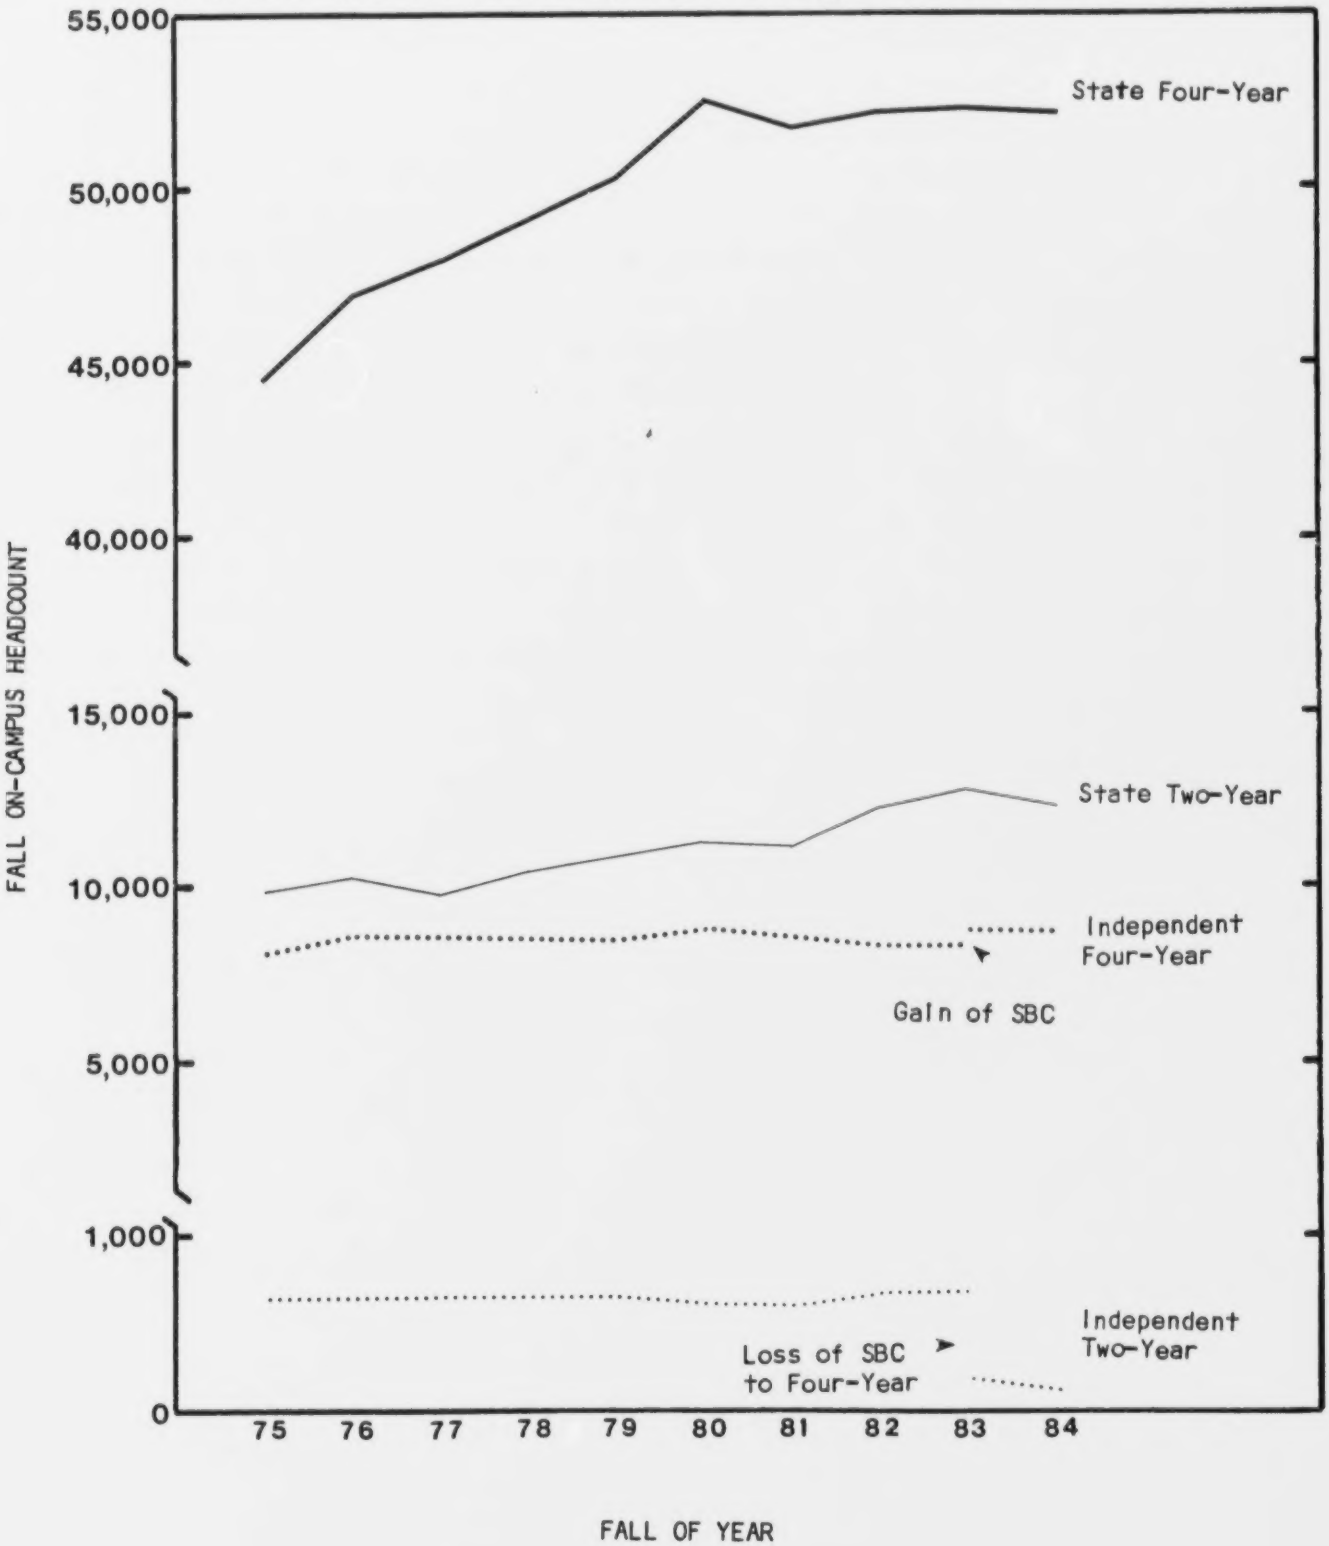
Independent Two-Year

Enrollment at the two-year independent colleges showed the largest percentage decline of all the institutions. Again, this is in part due to SBC's moving to the independent four-year category. Figure 1 displays the effects of SBC's move. One college did, however, increase over last year's enrollment. Crowley's Ridge College increased by 9.9% while Shorter College plummeted by 24.3%. After adjusting the figures to reflect the move by SBC, the independent two-year group declined by 7.4%.

Independent Four-Year

In the fall of 1984, 8,644 students attended independent four-year institutions. This figure represents a 5.3% increase over last year's 8,211. Without the adjustment for SBC's moving into the four-year category, the independents would have lost 0.5%. The largest increases in headcount came from Philander Smith College (PSC) and Arkansas College (AC), while there were smaller increases by the College of the Ozarks and Central Baptist College (see Table 2). The independent institutions increased in proportion of the state's total enrollment from 11.1% in 1983 to 12.0% in 1984.

FIGURE 1. FALL ON-CAMPUS HEADCOUNT BY TYPE OF INSTITUTION, 1975 THROUGH 1984



First-Time Enrollment

Table 3 provides information on actual and projected high school graduates. This information is updated yearly to reflect the most current data on grades 1 through 12. The early 1990's is projected to be the time when the number of high school graduates will reach its lowest point, approximately 24,505. The number of first-time enrollees in Arkansas' colleges and universities are an obviously strong derivative of the number of the preceding spring's high school graduates; nevertheless, 14% to 15% are above the age for traditional first-time entering freshmen.

TABLE 3. ARKANSAS HIGH SCHOOL GRADUATES, ACTUAL 1974-75 THROUGH 1983-84, PROJECTED 1984-85 THROUGH 1999-2000

Figures recently reported in the Geographic and Institutional Origin of Arkansas College Students, Fall 1984, show that the percentage of previous spring's Arkansas high school graduates entering state and independent institutions was up over fall 1983 by 0.1 percentage point. As Table 4 indicates, the number of first-time entering college freshmen has decrease by 4.1% and yet the college-going rate was up slightly over last year. Arkansas' college-going rate is determined by dividing the number of full-time first-time-entering freshmen whose residence is Arkansas by the number of Arkansas high school graduates the previous spring. A recent ADHE data brief reported that maintenance of a college-going rate of 39.4% through the next decade would mean that the number of full-time first-time entering freshmen would continue to decline in the years to come. Table 5 provides a historical account of the fall on-campus headcount of full-time first-time enrollees from 1981 through 1984. Statewide and institutional efforts to increase interest in college attendance among high school students could raise the college-going rate and, thus, prevent or moderate an enrollment decline.

Other-Lower Division Enrollment

Every category of institution has declined in full-time other-lower-division enrollment with one exception, the independent four-year group. Again, this is a result of SBC's being moved to the independent category. The remaining institutional groupings had anywhere from a 69.7% to a 3.8% decline. On the other hand, the part-time enrollment has increased by 4.4%. Every type of institution has increased in part-time other-lower-division students with the exception of the two-year independent category.

* SBC was accredited in 1983 to award baccalaureate degrees.

Upper-Division Enrollment

Upper-division enrollment has decreased from last year's 19,768 by 0.5%. The decline was due to the downswing in full-time students at both the state and independent institutions. The independent four-year institutions declined 10.6% from fall 1983. The state four-year institutions increased by 5.9% in part-time students to bring about a record high of 2,949.

Unclassified Pre-baccalaureate Enrollment

In total, unclassified pre-baccalaureate enrollment rose by 2%. This increase is a result of the 7.4% increase in part-time students. The increase in both part-time and total came at the four-year institutions while the two-year colleges declined.

Both the state and independent four-year institutions experienced increases in part-time students by 7.9% and 31.3%, respectively. Even with SBC moving out of the independent four-year category, the independent four-years would still have a substantial increase in unclassified while the independent two-year colleges still would have experienced a decline.

Graduate and First-Professional Enrollment

Eleven of Arkansas' thirty-two colleges and universities offer degrees beyond the baccalaureate. In fall 1983, these eleven institutions had a combined graduate and first-professional enrollment of 6,199. This fall the number had increased 9.6% bringing the total to 6,796.

Part-time graduate enrollment increased by a prodigious 20%. The fall 1983 part-time graduate enrollment was 3,054 whereas, in fall 1984, 3,665 students enrolled in graduate programs throughout the state. Full-time enrollment was down slightly from 1983; 10 fewer students enrolled (see Table 4).

First-professional enrollments continued to decline although the number of part-time students increased slightly to 55 in 1984 from 49 in 1983.

Part-Time Enrollment

In last year's On-Campus Enrollment in Arkansas Higher Education Institutions, Fall 1983 report, it was reported that Arkansas' colleges and universities enrolled a record number of part-time students. This year the rise has continued to an all-time high of 20,624 (see Table 6). Table 7 displays the percent full-time and percent part-time fall on-campus headcount by institution. The percent of total students has increase to 28.1%. Every category reported percentage increases in part-time students with the greatest increases in percentage points occurring at the state two-year institutions -- 2.4 (see Apendix A-5 for detail on state two-year breakdown), and the independent four-year (2.3).

With the part-time enrollment increasing by 983 and the full-time enrollment decreasing by 1,560, a net decrease of 577 students occurred. This net decrease means that nontraditional students must be pursued and registered to compensate for the declining enrollment.

Enrollment By Sex

One of the proposed offsets to the falling numbers of traditional college-age students, according to D. W. Breneman in an article entitled "The Coming Enrollment Crisis: Focusing on the Figures,"[3] is to focus recruiting efforts on women. Breneman argues that the phenomenon of "catching up" -- which will probably not repeat itself -- will cause women from an older age group to make up for educational opportunities missed earlier in the 1970's. Table 8 provides information on male and female as percentages of fall headcount enrollment by institution, fall 1980 through fall 1984. According to the Fact Book on Higher Education in the South 1983-84, women as a percent of total enrollment rose steadily from 1965 to 1975 on the average of 0.48 percentage points per year; however, from 1975 to 1982 the percent of women as a percent of total enrollment regionally rose by a dramatic 1.23 percentage point per

year. Arkansas experienced just about the same increase, proportionately, within that same time frame; nevertheless, the greatest increase has occurred since the 1982 figures were released in the 1983-84 Fact Book (see Table 8).

State institutions have increased their ratio of women to men while the independent four-year institutions show a decline. This would tend to support the idea that older female students who may not have the funds to attend more expensive institutions would seek a lower-cost institution to fulfill their educational ambitions; however, this hypothesis cannot be substantiated for Arkansas because of a lack of data on male and female, full and part-time students by age.

Enrollment by Age

Table 9 displays median age of students by student level by type of institution for fall 1981 through fall 1984 (see Appendix A Table A-6 through A-17 for detailed information by institution and level). The median age of students in each category has varied little during the past four years. This trend will more than likely change, for a time, as successive pools of first-time-entering freshmen continue to decline as a percent of the total undergraduate enrollment. The median age of other undergraduates was 21. Full-time graduate students' median age was 26, while the median age of part-time graduate students was 32, which is higher than last year's median age. The median age for full-time and part-time first-professional students is down by one year and two years, respectively. This might mean that students are deciding at an earlier age to pursue a career in medicine or law.

Enrollment by Current Legal Residence

Migration into the State of Arkansas by students is yet another way to offset the decline in enrollment. By definition, a student's current legal residence is his present legal residence for the period being reported. Current legal residence differs from geographic origin in that current legal residence may change from semester to semester while geographic origin is the origin of the student at the time of original admission to the institution. As long as the student is enrolled at the institution, geographic origin remains the same.

Table 10 displays on-campus headcount by student level and current legal residence by type of institution for fall 1981 through fall 1984 (refer to Appendix A, Tables A-18 and A-19 for detailed information by institution). Current legal residence information is collected only from the 20 state-supported Arkansas colleges and universities. Total full-time out-of-state enrollment has declined to less than those figures reported in 1982. The state two-year colleges increased slightly over last year; however, the number of full-time out-of-state students is still under the 1981 figure. The number of part-time out-of-state students enrolled at the two-year institutions is also slightly up from last year. The total number of out-of-state part-time students has increased by 4.2%. Table 11 shows that this increase has not brought about an increase in the average load per student.

AVERAGE LOAD

Average load is calculated by dividing the number of student semester credit hours (SSCH) by the number of students. Table 12 displays average load data by student level by type of institution for 1981 through 1984. Average loads have varied little during the past four years. The average load for a full-time undergraduate student was 14.55 hours, and for a part-time undergraduate student, the average load was 5 hours. The average load for full- and part-time graduate students was 11 and 4 hours respectively.

The average load for full-time first-professional students was 16 hours. The average load for law students at UAF was 14 hours, while the average load at UALR was 12 hours. The average load for medical students at UAMS was 19 hours. Appendix A, Tables A-18 through A-23 displays headcount and average load by student level by institution for fall 1984.

APPENDIX B

APPENDIX B: GLOSSARY

Enrollment Status. A student's current attendance status in a post-secondary education institution. The following mutually exclusive categories will be used:

1. First-time-entering Undergraduate Student. A student entering any college for the first time ever. For reporting purposes, this category includes students enrolled in the fall term who entered college for the first time in the prior summer term and students who entered with advanced standing and may actually be classified beyond the freshman level at entry.

2. Entering Undergraduate Transfer Student. An undergraduate student entering the institution for the first time with academic credit attempted or earned at another institution (whether or not the credit is accepted by the institution to which the student transfers). For reporting purposes, this category includes students enrolled in the fall term, who first enrolled as transfer students in the prior summer term.

3. First-Time-Entering Graduate Student. A student who has been awarded an earned baccalaureate or first professional degree and who is entering any institution classified as a graduate level student for the first time. "Graduate Student" includes students enrolled at any level of graduate study - Master's, Specialist, or Doctoral.

4. First-Time entering First Professional Student. A student entering any institution classified for the first time as a first professional students. The student may have been enrolled as an undergraduate or graduate student at the reporting institution.

First-Time-Entering. Refers to a student's initial enrollment at an institution at a given general student level. See **ENROLLMENT STATUS.**

Geographic Origin. The legal residence of a student at the time of original admission to the institution. The following mutually exclusive categories will be used:

1. In-State. A student who atends a postsecondary education institution in the state in which he or she had legal residence at the time or original admission.

2. Out-of-State. A student who attends a postsecondary education institution outside of the state in which he or she had legal residence at the time or original admission. Foreign students are not included in this category.

3. Foreign. A student who attends a postsecondary education institution outside of the country in which he or she had legal residence at the time of original admission.

The in- and out-of-state student categories of this term should not be confused with "In-State Students" and "Out-of-State Students" as classified by Current Legal Residence. The former designations are for purposes of classifying a student's legal residence Upon first admission, while the latter are for classifying a student's current legal residence, usually for tuition-and-fee purposes in state-supported institutions.

Student Level. Refers to the proportion of total requirements a students has obtained, as of the census date, toward the completion of the degree/diploma or certificate program in which the student is enrolled. The following mutually exclusive student level categories will be used.

1. Lower Division. A student who a) is enrolled in a program(s), course(s) or study, or activit(ies) which leads to an associate degree (including three-year associate degree programs) or a bachelor's degree and has earned less than 60 semester credit hours; or b) is enrolled in an undergraduate occupational or vocational program(s) of three or fewer years' duration which results in formal recognition below the baccalaureate

degree. (Typically, this individual should be classified as a freshman or a sophomore.)

2. Upper Division. A student who a) is not in an associate degree or occupational/vocational program(s), b) is enrolled in a bachelor's degree program, and c) has earned 60 semester credit hours. (Typically, this individual is classified as a junior or a senior.) This category includes a student in years three, four, or five of a five- year bachelor's degree program.

3. Unclassified Pre-Baccalaureate. A student who cannot be classified into one of the categories above because he or she is not enrolled in a program of study leading to a degree/diploma or certificate, even though taking courses with regular students. This category does not include students who have been admitted to pursue a degree but have not yet declared a major. This category does include students who have received an earned baccalaureate degree, have not been accepted by the institution for graduate-level study, and are taking undergraduate-level courses, such as teachers taking courses for certification.

4. First Professional. A student who is enrolled in a first professional degree program. First Professional degrees offered in Arkansas are as follows:

   a. Law, General (LLB or JD)
   b. Medicine (MD)
   c. Pharmacy (D Phar)

5. Master's. A student who has received an earned baccalaureate degree, has been accepted for graduate-level study and a) is enrolled in a master's degree program, or b) is enrolled in a doctoral program but has earned less than 30 semester credit hours in graduate course work.

6. Specialist. A student who has received an earned baccalaureate degree and is enrolled in a specialist degree program.

7. Doctoral. A student who has received a master's or specialist degree, or has earned at least 30 semester credit hours in graduate course work, and who is enrolled in a doctoral degree program.

8. Unclassified Post-Baccalaureate. A student who has been awarded an earned baccalaureate degree and who is eligible to enroll in credit courses at the graduate or other post-baccalaureate level but who cannot be classified into one of the categories above because he or she has not been accepted by the institution for graduate-level study.

APPENDIX C

APPENDIX C: INSTITUTIONAL NAMES AND ABBREVIATIONS

State Four-Year

Arkansas State University - Jonesboro	ASUJ
Arkansas Tech University	ATU
Henderson State University	HSU
